

Stephen Miller
DeLaPorte Liaison for
Lockheed Martin Missiles & Fire Control

Stephen is the DeLaPorte & Associates, Inc. (DLP&A) liaison to Lockheed Martin Missiles and Fire Control-Orlando. He received his Bachelor's in Communications from Graceland University in Lamoni, Iowa.

Stephen has worked at Lockheed Martin Missiles and Fire Control- Orlando since 1994, overseeing all training and manpower communications for their 1500+ engineering department. Since 2001, Stephen has served as the DLP&A on-site representative to LMMFC-Orlando. Because of his experience at this site, he is able to help customize the DLP&A product to Lockheed's specific needs.

One of these specific initiatives is Leadership 21, an aggressive 21st century program co-designed by the DLP&A team and Lockheed personnel at Dallas and Orlando. In the broadest sense, the purpose of the initiative is knowledge transfer: ensuring that expertise in the LMMFC enterprise is shared, perpetuated, and grown. This is accomplished through a system that comprises assessment instruments, mentoring, training and much more.

Stephen teaches classes in mentoring, career development, and project management. In the last two years, he has overseen confidential Leader Navigator assessments for over 500 people. He is also active in class assessment and improvement. In addition, Stephen works with his DLP&A counterpart at LMMFC-Dallas, Susan Zimmerman. Together they ensure that the customer is getting the best product available.

In his free time, Stephen is involved in a non-profit organization that encourages new playwrights by fostering development and production of their scripts. Stephen's scripts have been produced throughout the United States and even in the United Kingdom.
